Share on Pinterest Typhoid is an infection caused by Salmonella typhimurium bacteria that is spread from human to human. Typhoid is an infection caused by the bacterium Salmonella typhimurium (S ...

Typhoid: Symptoms, treatment, causes, and prevention

The cause is the bacterium Salmonella enterica subsp. enterica serovar Typhi growing in the intestines and blood. Typhoid is spread by eating or drinking food or water contaminated with the feces of an infected person. Risk factors include poor sanitation and poor hygiene. Those who travel in the developing world are also at risk. Only humans can be infected. Symptoms are similar to those of many other infectious diseases. Diagnosis is by either culturing the bacteria or detecting their DNA in t

Typhoid fever - Wikipedia

The laws that determine and govern the spreading of typhoid fever in one part of the world have the same determining and governing influence in any other part. The specific poison by which the disease originates and spreads is the same everywhere, and, without doubt, the media of its transmission are the same everywhere.

The Prevention of the Spread of Typhoid Fever

Typhoid Mary. Mary Mallon, known as "Typhoid Mary", was an asymptomatic carrier of Salmonella enterica serovar typhi, the causative agent of typhoid fever. She was a cook for several families and soldiers in New York City during the late 1800s, and several cases of typhoid fever were traced to her by the Health Department.

Asymptomatic carrier - Wikipedia

It was his experiences in France that sparked Budd's interest in how the disease was spread 4. In England the condition was commonly known as typhoid fever because of certain resemblances to typhus, although the two conditions were sometimes confused.

William Budd and typhoid fever - PubMed Central (PMC)

Salmonella Typhi is a human host-restricted pathogen that is responsible for typhoid fever in approximately 10.9 million people annually. The typhoid toxin is postulated to have a central role in disease pathogenesis, the establishment of chronic infection and human host restriction.

Investigation of the role of typhoid ... - Nature Medicine

Although Budd, author of Typhoid Fever: Its Nature, Mode of Spreading, and Prevention, had overlooked flies as typhoid vectors, Sternberg's Circular noted that countering their propensity to "swarm around fecal matter" was as powerful a justification for "strict" sanitary measures as avoiding polluted water. Those measures included officers' obligation to favor previously unoccupied sites when locating camps.
