Librivox.org is a dream come true for audiobook lovers. All the books here are absolutely free, which is good news for those of us who have had to pony up ridiculously high fees for substandard audiobooks. Librivox has many volunteers that work to release quality recordings of classic books, all free for anyone to download. If you've been

The Physics of Vibrations and Waves

$m(\dot{x}y - y\dot{x}) = m(-ab\omega \sin 2\omega t - ab\omega \cos 2\omega t) = -abm\omega(\sin 2\omega t + \cos 2\omega t) = -abm\omega$ which is a constant. The quantity $abm\omega$ is the angular momentum of the particle. 1.16 All possible paths described by equation 1.3 fall within a rectangle of $1/2a$ wide and 2
